DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Starr on June 15, 2005.

The application has been amended as follows:

The claims have been amended as follows:

Referring to claim 19, line 1, -- implemented on a computer-readable medium-- has been inserted after "program".

Referring to claim 19, line 29, --one-- has been inserted, replacing "on".

Referring to claim 20, line 1, -- implemented on a computer-readable medium-- has been inserted after "program".

Referring to claim 20, line 29, --one-- has been inserted, replacing "on".

Specification

2. The objection is withdrawn due to the amendment.

Claim Objections

3. The objection is withdrawn due to the Examiner's amendment.

Claim Rejections - 35 USC § 112

4. The rejections are withdrawn due to the amendment.

Allowable Subject Matter

5. The following is an examiner's statement of reasons for allowance:

Referring to claim 19, Antoshenkov (US Patent Number 5,664,172) teaches a 'limit_count' that is incremented every time a key after the current key is accessed and is found to satisfy the user query. Antoshenkov also teaches that each time that a key is skipped in the search, the limit_count is set to zero. The value of the limit_count is used to determine which search method to use (col. 23, line 31- col. 24, line 5). While the variance of the limit_count can be said to be the positive and negative swing value of the search program of claim 19, Antoshenkov does not teach "recording a positive swing value each time a selected leaf page resulting from the search is not a same leaf page as a leaf page that would be selected by a sequential leaf search, and recording a negative swing value each time a selected leaf page resulting from the search is a same leaf page as a leaf page that would be selected by a sequential leaf search". Therefore neither Antoshenkov alone, nor in combination with Kodavalla, teach or suggest all of the claim limitations as recited in claim 19.

Referring to claim 20, Antoshenkov teaches the disabling and enabling of the trapeze fetching method by a 'switch mechanism' (col. 17, lines 5-11), however, Antoshenkov does not specifically teach sending a disable signal if the B tree did not skip any leaf pages when last performed. Therefore neither Antoshenkov alone, nor in combination with Chen, teach or suggest all of the claim limitations as recited in claim 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cheryl M. Fernandes whose telephone number is (571) 272-4018. The examiner can normally be reached on 9:00 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Safet Metjahic can be reached on (571) 272-4023. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
